For office use only

Month of signup: _____ Predicted Budget Payment: _____

Budget Plan Details:

How It Works:

The budget program is designed to create a credit on your account that is applied to your heating oil bill when you get a delivery. If you do not have enough money in your budget, you will be required to pay the amount due before you receive an oil delivery. You can cancel your enrollment in the budget plan at any time and your remaining credit balance will be refunded!

Monthly Statements:

Each Month you will receive a monthly budget statement that will be due upon receipt. It will indicate your regular monthly payment as well as any other charges covered by your budget plan. In addition, the statement will keep you informed of your actual account balance throughout the year.

This is a pre-pay plan; any balance that exceeds what is available in your budget account at the time of delivery will be due immediately.

Fuel Delivery:

Upon each fuel delivery, our driver will leave a receipt at the property showing the total gallons delivered, price per gallon charged on delivery, and current remaining budget balance.

Convenience:

The budget plan is the best way to stay on top of paying your fuel bills. It gives you the freedom and peace of mind knowing what your monthly payment will be which allows you to spread your annual heating costs over the course of 12 months.

Getting Started:

Fill out and submit our Sign-up Form above for an estimate. Or, print the PDF form, fill it out, and return it to us; Our representative will contact you when we receive your form to ask a few questions to ensure an accurate projection. Then we'll let you know your low monthly payment amount based on our usage estimate. You will be required to start the program on a full tank of oil, or send a deposit that would cover a full tank. This is to avoid budget funds from being used right away.

Please keep in mind that different factors affect how much oil is used by your specific furnace/boiler, some of these include:

- The Condition of the Furnace (This is why tune-ups are recommended)
- The Actual Size of the Home
- Whether or Not Oil is Used to Heat Water
- The Approximate Number of People Living in the Home
- How Old the Home Is
- The Efficiency of Windows, Doors, and Other Components that Require Insulation.
